**KÜCHENMEISTER®**

## **The new generation of the MKN - „KÜCHENMEISTER“**

MKN, the German premium manufacturer of professional cooking technology, presents, the new “KÜCHENMEISTER“ premium cooking block, at the INTERNORGA 2008 trade fair. Ergonomically perfectly shaped and technically sophisticated, its flowing lines are a visual attraction in every kitchen.

You will find technical and design innovation here that can only be found in the “KÜCHENMEISTER“.

Its highlight – a new operation design concept: the operation panel, at an angle, combines perfect height with comfortable operation and with aesthetic and dynamic modern flowing ergonomics and stands out distinctly, optically, when compared to standard lines. Only the new „KÜCHENMEISTER“ is equipped with high quality, perfectly shaped operation buttons and extraordinary spherical corners which make it unmistakable, particularly functional and easy to clean. Unique details, which harmonise ergonomics and modern aesthetics and accentuate the high quality manufacturing design of the „KÜCHENMEISTER“. Combinable, innovative energy systems, like the new, the original MKN high power-surface – induction or electric and gas hobs allow the chef to work with the latest technology and to combine different ways of heating (gas, electric, induction). The smallest combisteamer HansDampf from MKN even find its useful place on a rotating podium. Unique and in any size and shape the new „KÜCHENMEISTER“ coordinates room conditions and specific customer needs perfectly.

The MKN - „KÜCHENMEISTER“ – A strong heart at the centre of every modern professional kitchen.

**„KÜCHENMEISTER“ – the art of great kitchens.**
