German gold winner chefs successful using MKN technology

Around 1 600 chefs from 53 nations started in Erfurt at the IKA 2008 – the largest Culinary Olympics in the world – to demonstrate their creative culinary art and present a seasonal menu to the critical members of the jury.

It rained gold for the German national youth team! After four exciting days the six man team had convinced the jury. The conditions which surrounded the achievement of such excellent performances complemented one another perfectly: The Olympic Champions cooked with the most modern premium cooking technology from MKN.
