MKN - Innovation

Premiere at the INTERNORGA trade fair 2006 in Germany!

MKN presented:

Electric, low pressure steam, quick cooking kettle with mixer and cooling module.

The thermal professional cooking technology specialist presents, for the first time in Germany at the INTERNORGA trade fair, the mixing cooking kettle with cooling module. The mixing cooking kettle from MKN is the ideal appliance for cook and chill production kitchens and is distinguished by the electronic process regulation EcoControl, easy and safe operation, but also by compact block construction. The mixing cooking kettle, together with the pressure cooking family **OptimaExpress** for modern community catering, provide a powerful combination; so completing the product line for community and industrial catering from MKN.
