

Master of Performance

Top Star Chefs trust in MKN Professional Cooking Technology

The renowned TV and star chefs Alfons Schuhbeck, Johann Lafer and Mario Kotaska all appreciate the finer things in life: In their kitchens they attach importance to the highest quality, whether it be ingredients or kitchen equipment, in order to constantly achieve top performances.

All three of them have decided independently of each other in favour of MKN's professional cooking technology; Johann Lafer, for example, has been working with the professional cooking technology from MKN for over 15 years and was extremely impressed by the new generation of the individual MKN KüchenMeister cooking blocks and the innovative combisteamers and has decided resolutely again in favour of MKN technology.
